

Coding with Cargo-Bot

1. Download the CargoBot app from the App Store.
2. Open the app.
3. After the app loads, tap the screen to start.

4. Begin with the "Tutorials" Level and work your way through the lessons. Pay attention to the tips and hints along the way.

5. At the end of your class period/work time, take a screen shot of the "Level Packs" screen to send to me. Try to get as many stars as you can at each level.

6. Have fun! You don't have to complete this all in one day. We will work through it over the course of the trimester. This is an acceptable "game" to play when you are done with your other work.
