

Depth of Knowledge Vocabulary

For each subject choose different DOK words and explain how they are used in that subject to demonstrate knowledge. For example, a DOK word that is not on your list is “graph”. You could use graph in math and say: In math a teacher asks us to graph the answers to an inequality because that shows that we understand when something is greater than or less than based on the direction of the arrow. It also can indicate that greater than or equal to includes the first number by filling in the circle (an empty circle means that number isn’t included). The expectation is at least two complete sentences for each example.

Science:

DOK word: _____

DOK word: _____

DOK word: _____

Social Studies:

DOK word: _____

DOK word: _____

DOK word: _____

Math:

DOK word: _____

DOK word: _____
