

Table Group #

Introduction to Minerals "Sock Puppet Skit"

Your table group will be assigned one of the following topics to introduce to your classmates:

1. What is a Mineral? Discuss mineral characteristics. Pages 66-67
2. Identifying Minerals using color and streak. Pages 68-69
3. Identifying Minerals using luster. Page 69
4. Identifying Minerals using density. Page 70
5. Identifying Minerals using hardness - Mohs Hardness Scale. Pages 70-71
6. Identifying Minerals using crystal systems. Pages 72-73
7. How Minerals Form from magma and lava. Pages 76-77
8. How Minerals Form from solution. Pages 76 - 78

Read about and discuss your groups assigned topic. Your task is to create a short skit to introduce your classmates to the topic your table group has been assigned. You **MUST**

- A. Include ALL members of your table group in the skit
- B. Write out a script and assign roles to each member of your table group
- C. Keep skit to 90 seconds or less
- D. Use "Sock Puppets" app on iPad to record your skit

Each group will have a limited amount of time with the iPad to set up and record their skit. You must have your script written and be completely prepared before you will be allowed to use the iPad. Please remember that there are 8 groups that will need to record during the time available. Be respectful of your classmates and use your time wisely. You will have only one class period to complete this assignment.

Sock Puppet skits will be shared in class.
